Ice Cream Parlor Cafe Application

Description

This application allows users to manage an ice cream parlor cafe, including listing seasonal flavors, adding ingredients, suggesting new flavors, managing allergens, and more.

How to Run

Prerequisites

- Python 3.x

- SQLite

Test Steps

1. List Seasonal Flavors

   - Select option 1 from the menu.

   - Verify that the list of seasonal flavors is displayed.

2. Search Flavors

   - Select option 2 from the menu.

   - Enter a keyword to search for.

   - Verify that the search results are displayed correctly.

3. Add Ingredient

   - Select option 3 from the menu.

   - Enter an ingredient name and quantity.

   - Verify that the ingredient is added successfully.

4. Add Customer Suggestion

   - Select option 4 from the menu.

   - Enter your name, flavor suggestion, and any allergy concerns.

   - Verify that the suggestion is added successfully.

5. Add Allergen

   - Select option 5 from the menu.

   - Enter an allergen name and description.

   - Verify that the allergen is added successfully.

6. Add Flavor to Cart

   - Select option 6 from the menu.

   - Enter the flavor ID to add to the cart.

   - Verify that the flavor is added to the cart.

7. View Cart

   - Select option 7 from the menu.

   - Verify that the cart is displayed with the added flavors.

8. Add Seasonal Flavor

   - Select option 8 from the menu.

   - Enter the flavor name, description, and ingredients.

   - Verify that the seasonal flavor is added successfully.

9. Exit

   - Select option 9 from the menu to exit the application.
